360°

AXIprobe distortion sensor

Monitor the behavior of all packaging

Features

Insertion in static or rotary retorts

Sensor stroke: 40 mm

Totally settable zero center

Minimum encumbrance

Measurement sensitivity: 0.1 mm

Ingress protection rating: IP 68 below 5 bar

Temperature hold: from 0.5°C to 125°C (130°C at peak)

Specificities

No return spring

Customizable touch point

Connection to AXIfil or AXIradio center

Fully maintenance free

Applications

All packaging types:

Material, type, shape

Identification of the pressure

at which products bear packaging

Ring reading measurement

Useful tip

Our multipurpose putty ensures efficient bonding
on all your packaging types
