

## Elimination of distortions

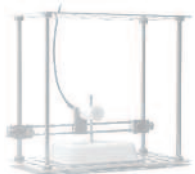

Guarantee your packagings with integrity

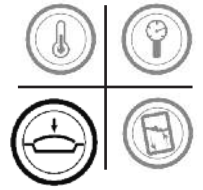

- Adjustment of scales for same Fo / Po
- Respect of materials performance
- Account taken for production disparities

**INTEGRE**

## Elimination of distortions

Guarantee your packagings with integrity

### Objective

**Avoid irreversible distortion**  
of your packaging

### Methodology

**On-site evaluation:**

- Instrumentation of your packaging by our monitoring system (temperature, pressure, distortion)
- Monitoring of a standard cycle
- Analysis of recordings

**Test phases:**

- Construction of new scales
- Monitoring of modified scales distortion

**Validation process:**

- Measurement with partial load
- Confirmation of results with full load

### Commitments

**Fast installation**

of applicable arrangements

**Guaranteed integrity**

of your packaging

**Skills transfer**

for autonomous use of the distortion system

**Fo / Vo validation**

for all scale modifications
