

Digital vacuum gauge

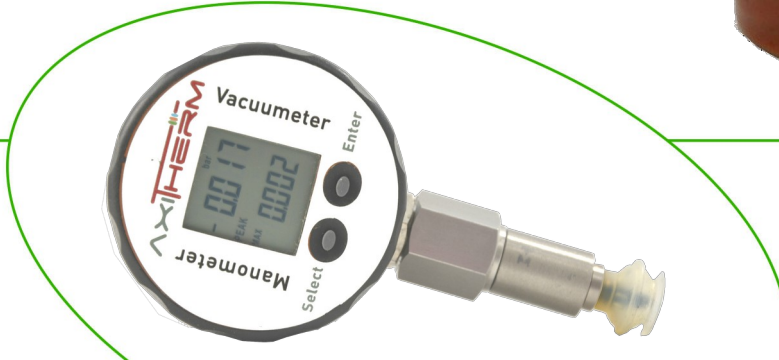

Measure vacuum and pressure without fear of leakage

bar
mbar
hPa
MPa
PSI

Vacuum and pressure control in food industry

Very fast measurement scan = accurate even in case of leakage

Perfect for quality service and R&D

Digital vacuum gauge

Measure vacuum and pressure without fear of leakage

Specificities

Waterproofness IP 65

User-interchangeable long-life battery power supply

All stainless steel sensor with standard ¼ male gas connection

Fully maintenance free

Applications

As controller for vacuum packaging:

- ⇒ heat sealing, capping and vacuum seaming qualification
- ⇒ used with flexible or rigid packaging perforator

As standard pressure gauge for retort:

- ⇒ pressure regulation control of sensitive process
- ⇒ used with the connecting cannula

Performances

Dual display: instant and mini/maxi

Unit selection: bar, mbar, hPa, MPa et PSI

Zero setting on atmospheric pressure

Measuring range: -1 to +3 bar

Accuracy: +/-0.2% full scale

« Peak » function: 5000 Hz scanning

Indications: low battery, unit, overload, peak fonction, ...
